**Assoc. Prof. dr. Laura Monica GORGHIU
Rector
Valahia University of Târgoviște**

24 May 2022 No. (57.3.1.)SD57-47

Dear Rector,

I am delighted to extend my warmest congratulations to the Valahia University of Târgoviște on its 30th Anniversary.

Ever since its founding in 1992, the University has played an important role in the delivery of higher education, providing a strong foundation to nurture numerous proficient and dedicated professionals. I am confident that the University will continue to play a significant role in the Romanian education system and in international academic relations, by offering a great vision for the modern times, and namely, concern for professional integration.

In celebration of its anniversary, I would like to express my appreciation for the Romanian Association for Baltic and Nordic Studies (ARSNB), which helps students and researchers establish closer relations and bonds between the Black Sea and Baltic Sea areas, through the studying of history, politics and international relations, culture and language of Baltic and Nordic states. We feel privileged to have Prof. Silviu Miloiu as the main pillar and the main bridge which unites our academic worlds and keeps enriching these links with new initiatives and opportunities. Moreover, we are deeply honored to have the Library of Baltic and Nordic Studies called after the late Prof. Leonidas Donskis – one of the most significant personalities and one of the most famous Lithuanian liberal theoretic, who was member of the Romanian Association for Baltic and Nordic Studies, MEP and promoter of EU's core values: tolerance, dialogue and human rights.

On this very important occasion, dear Rector, I would like to congratulate once again all teaching staff, students and alumni and wish the Valahia University of Târgoviște continued success in the years to come.

Please accept, dear Rector, the assurances of my highest consideration along with the best wishes for this special occasion.

Ambassador of the Republic of Lithuania

Violeta Motulaitė
